## DETAILED ACTION

### *Examiner's Statement of Reasons for Allowance*

1. Claims 1-26 are allowed over prior art.
2. This action is in reply to applicant's correspondence of 22 March 2007.
3. The following is an examiner's statement of reasons for the indication of allowable claimed subject matter.
4. As per claims 1, 7, 14, 20 and 24 generally, prior art of record, Zeng et al, U.S. Patent No. 6,505,299 B1, fails to teach alone, or in combination, at the time of the invention, the features as discussed and remarked upon in the response of 22 March 2007 to office action of 12/05/2006.

Specifically, (as per claim 1, for example) prior art dealing with selective encryption as applied to compressed/digitally processed multimedia content data (i.e., techniques for selected encryption of sub-band structure information as related to visual/MPEG processed data streams; Pommer, A., et al, 'Selective encryption of wavelet packet subband structures for secure transmission of visual data', December 2002, Multimedia & Security Workshop, ACM Multimedia, pages 67-70, entire document, <http://www.ganesh.org/publ/papers/2002/Pommer02b.pdf>), is generally known per se. Nowhere in the prior art is found collectively the *italicized* claim elements (i.e., utilizing a process of transmission (to a recipient) of *encrypted, wavelet decomposed sub-band(s) separately* from *other* associated sub-band(s)), at the *time of the invention*, serving to patentably distinguish the invention from said prior art;

- "1. A method, comprising:

*converting original data into*  
*a plurality of sub-bands using*  
*wavelet decomposition;*  
*encrypting at least one of the sub-bands using*  
*a key to produce*  
*encrypted sub-band data; and*  
*transmitting the encrypted sub-band data to*  
*a recipient separately from*  
*the other sub-bands.”*

5. Dependent claims 2-6, 8-13, 15-19, 21-23 and 25-26 are allowable by virtue of their dependencies.

*Conclusion*

6.
